

Reshun Hydro-Power Project: Reshun hydropower project was constructed by SHYDO in 1999. The powerhouse is located about 52 km from Chitral Town towards Booni. The powerhouse is supplying a vast area in Upper and Lower Chitral through a network of 33 kV transmission and distribution lines. The salient features of the hydel station are as under:

TECHNICAL:

Design Head	315 m
Design Discharge	1.548 m ³ /s (54.67 cusecs) per machine
Installed Capacity	3 x 1400 kW = 4200 kW
Annual Energy	32.0 M kWh

T & D System:

Feeder-I	Reshun-Chitral - Juti Lasht (17 Nos. villages)
Feeder-II	Reshun – Turkhow Valley (30 Nos. villages)
Feeder-III	Reshun – Murkhow Valley (22 Nos. villages)
